

Would You Like To Learn How Your Child's Health Impacts Your Family?

Do you have children between 3 and 19 years old?

We are a research team at the University of Florida conducting research on how child, family, and healthcare service satisfaction impact parents' quality of life and family functioning.

What you will be asked to do:

Parent(s) will be asked to complete questionnaires asking them about their child, family, and healthcare service satisfaction.

Who we are recruiting:

If you are:

- 1) a parent of children between 3 and 19 years old
- 2) English speaking

OR,

If you are:

- 1) a parent of children with Congenital muscular dystrophy, Barth syndrome, or Duchenne muscular dystrophy between 3 and 19 years old
- 2) English speaking
